- Resume

WORK LOCATION: 900 Oakesdale Avenue SW, Renton, WA

WORK SCHEDULE: This position is exempt from the provisions of the Fair Labor Standards Act, and is not overtime eligible. The workweek is normally Monday through Friday.

PRIMARY JOB DUTIES INCLUDE: The Department of Development and Environmental Services (DDES) is looking for a master-level application developer to provide application development, systems analysis and project leadership to support our various business systems. Duties and responsibilities include:

- Provide technical and analytic expertise in conjunction with the business units and technical support staff to define business processes and propose/design technical solutions.
- Create and maintain applications using appropriate technology (.NET, ASP)
- Act as technical lead of the application development team.
- Work directly with the business users and technical support staff to define and document functional specifications.
- Define features, user interface requirements and develop technical specification documents.
- Develop and maintain project management plans.
- Manage and control day-to-day project activities, issues and risks.

REQUIRED KNOWLEDGE, SKILLS AND ABILITIES:

- Significant experience as an application developer performing progressively more complex and responsible IT tasks.
- Experience managing and implementing Web services and .NET technologies.
- Strong knowledge and experience developing, implementing and maintaining distributed client-server n-tier Web-based applications using many of the following: SQL, Informix (or Sql Server / Oracle), C# or VB.NET, ADO.NET, Visual Studio .NET, XML, XSLT, CSS, JavaScript, VBScript, ActiveX, and HTML.
- Strong knowledge of modern system architectures and distributed systems.
- Experience developing data models.
- Ability to work on numerous projects simultaneously, often with competing and shifting priorities.
- Demonstrated experience as a technical lead.
- Ability to quickly learn new business systems and processes.
- Advanced understanding of IT systems analysis.
- Ability to clearly describe processes, create functional specifications and convert business requirements into designs for system solutions.
- Strong writing and oral presentation skills.

DESIRABLE KNOWLEDGE, SKILLS AND ABILITIES:

- Training as a project manager with a clearly defined methodology.
- Advanced knowledge of analytical, management and finance systems.
- At least two years experience developing with .NET technology
- Experience developing XML web services, Windows services, and components.
- Experience modeling service-oriented architectures.
- Experience with UML.
- Experience in E-Commerce development.
- Current knowledge of security issues related to internet and intranet development.

UNION MEMBERSHIP: Positions in this classification are represented by Local 17, International Federation of Professional and Technical Engineers.
